

SCANFIBER COMPOSITES A/S

Scanguard Seat Protection

Instant protection against IED's and Rifle ammunition

Scanguard Seat Protection (SSP) is a personal protection system integrated around the cabin seat. SSP is an ideal solution for soft skinned vehicles without any protection.

The SSP can easily be installed at seats with integrated seatbelt. The SSP is designed to optimize the protection area and still keeping all seat functionality operable. Likewise, the views to both sides are kept at an optimum and comfortable and easy entrance and exit from the vehicle is secured. The SSP is quickly installed in the vehicle and can easily be removed if required.
