

TECHAYA New Rugged USB Charger - MILTECH 8P

Techaya military rugged USB charger – MILTECH 8P, enables to charge up to eight Smart Phones, PDA devices and other hand-held military and civil devices in APV's, APC's and other armored combat vehicles.

Due to the increase in use of USB based electronic devices such as Smart Phones, Tablets, PDA's in the modern battlefield, there is a constant need to charge these devices while transporting, in ground combat vehicles, to the battlefield. Thus, saving valuable battery charging capabilities to be used once the soldier dismounts from the vehicle.

The rugged MILTECH 8P, when mounted inside ground combat vehicles, can charge up to 8 USB based electronic devices simultaneously.

As such, the charger can be used in many mobile infantry applications, such as:

- Armored Petrol Vehicles.
- Armored Personal Carriers.
- Armored Fighting Vehicles.
- Military Trucks.
- Main Battle Tanks.

The MILTECH 8P offers the following characteristics:

- 8 USB2 connectors for charging, simultaneously.
- Requires standard charging cables.
- Charging capabilities: 2A/5V for each of the 8 connectors.
- Power Input: 24Vdc Nominal (9-36V), 80W Maximum.
- Power input is via a D38999/24WA98PA connector.
- Standards: MIL-STD810, MIL-STD-1275.

This new product diversifies the range of USB based solutions offered by Techaya.
