wheel protection.

ARMOUR
mobility

TSS Wheel Protection

ARMOUR *mobility*

TSS wheel protection can provide a solution for most vehicle types and budgets.

Rodgard Runflat system, because time can cost more than money when standing still.

Rodgard Runflat systems are light-weight, highly durable and strong enough to support a fully armoured vehicle. A vehicle equipped with Rodgard Runflat Systems is a vehicle that can keep moving in hazardous situations. We call that: Lifesaving Mobility.

RODGARD

No compromise for your braking system.

TSS has the ideal Braking System for specific customer requirements. Caliper, Friction ring and Braking Pad are perfectly adjusted to each other. MOVIT® SECURITY Heavy-Duty Brake Systems provide the highest braking force in the smallest space.

MOVIT

MOVIT® SECURITY Heavy-Duty Brake Systems

Introducing the Hutchinson 2-piece wheel with beadlock or VFI Runflat systems, guaranteed to keep you moving.

Off-road driving requires low tyre pressure. Hutchinson 2-piece wheels with beadlock, allow you to lower tyre pressure drastically, in order to maximise your grip. Hutchinson 2-piece wheels are also suitable for VFI Runflat systems.

HUTCHINSON

Unmissable... the Hutchinson VFI Runflat system, for when stopping is just not an option.

Designed especially for military applications, Hutchinson VFI Runflat systems are the unbreakable runflat system. The combination of Hutchinson 2-piece wheels and VFI with integrated beadlock ensures you can keep moving when stopping is just not an option.

TSS
HEAVY DUTY
WHEELS

TSS Heavy-Duty multipurpose wheels, more than 3.900 users worldwide.

Due to ever increasing payloads and limited availability of suitable wheels, TSS International has developed 18 and 20 inch multipurpose wheels, which can be fitted on various armoured 4x4 vehicles and limousines.

Technical specifications:

- 8.5 J x 18 AH2 / 9 J x 20 AH2
- Payload 1.600 or 1.800 kgs (TüV approved)
- Asymmetric Safety Humps
- Integrated runner (patent pending) for Rodgard APX / BPX Runflat systems
- Larger inside diameter for Heavy-Duty brake systems
- Steel inserts to allow over-torque

TSS Heavy-Duty wheels have exclusive synergy with Rodgard APX / BPX Runflat systems and MOVIT® SECURITY Braking Systems.

Rodgard BPX Runflat systems are especially developed for TSS Heavy-Duty wheels.
